It is important that the proposed wellness center meets the immediate needs and fulfills the aspirations of the Kamiah community in holistic terms of site, program, and sustainability while further becoming a source of community pride. The design should reflect values of openness, cooperation and community and provide the vision of positive growth and maturity desired by the community of Kamiah.

# MISSION

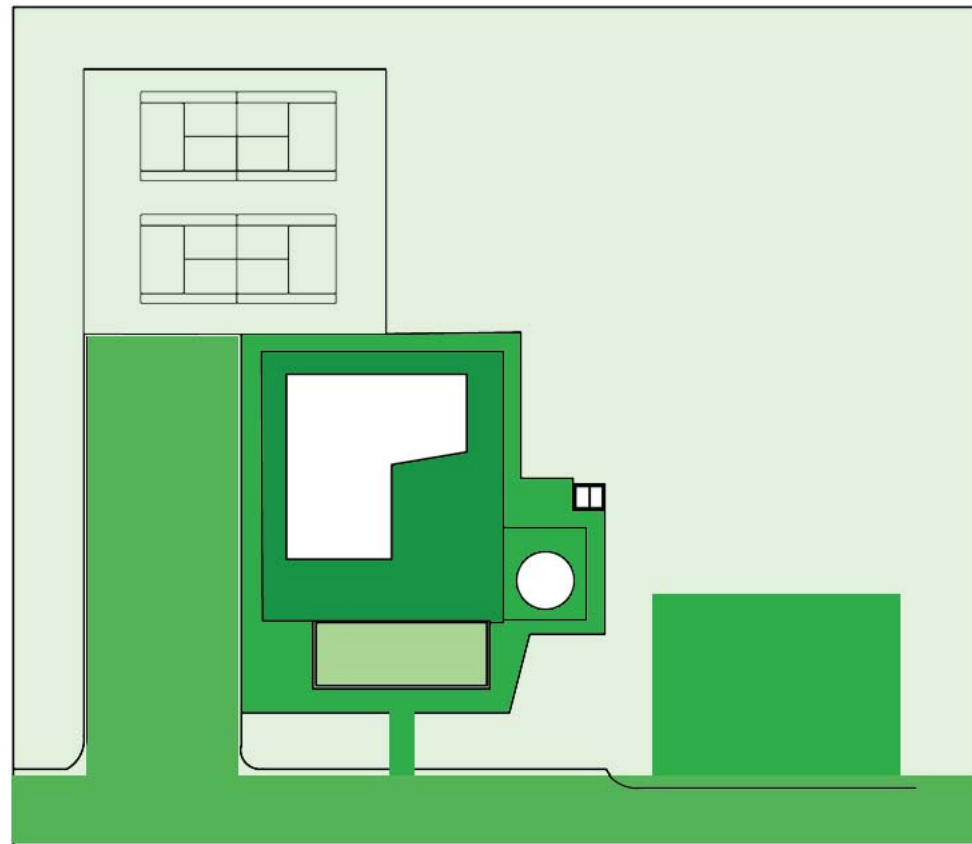

- Kamiah lies at an elevation of 1,240 ft in the Clearwater valley in Lewis County, Idaho.
- The population of the town is around 1160.
- The town receives 28.33 inches of precipitation annually.

- High Foot Traffic
- Moderate Foot Traffic
- Medium Foot Traffic
- Low Foot Traffic
- Little Foot Traffic

## Goals:

Inviting – Create spaces that feel welcoming from the inside as well as outside

Growth – Have a holistic design that promotes growth in the youth and community

Progression – The wellness center is to be a place of interest that leads Kamiah in the direction of future visions

Controlled – functionality is a vital role in creating spaces that create order

Protective – The wellness center needs to be a place that parents and the community feel comfortable for youth to interact

## Accomplishing the Goals:

Inviting – The building especially the entry is reaching out to the community, while the inside has a warm and natural feel

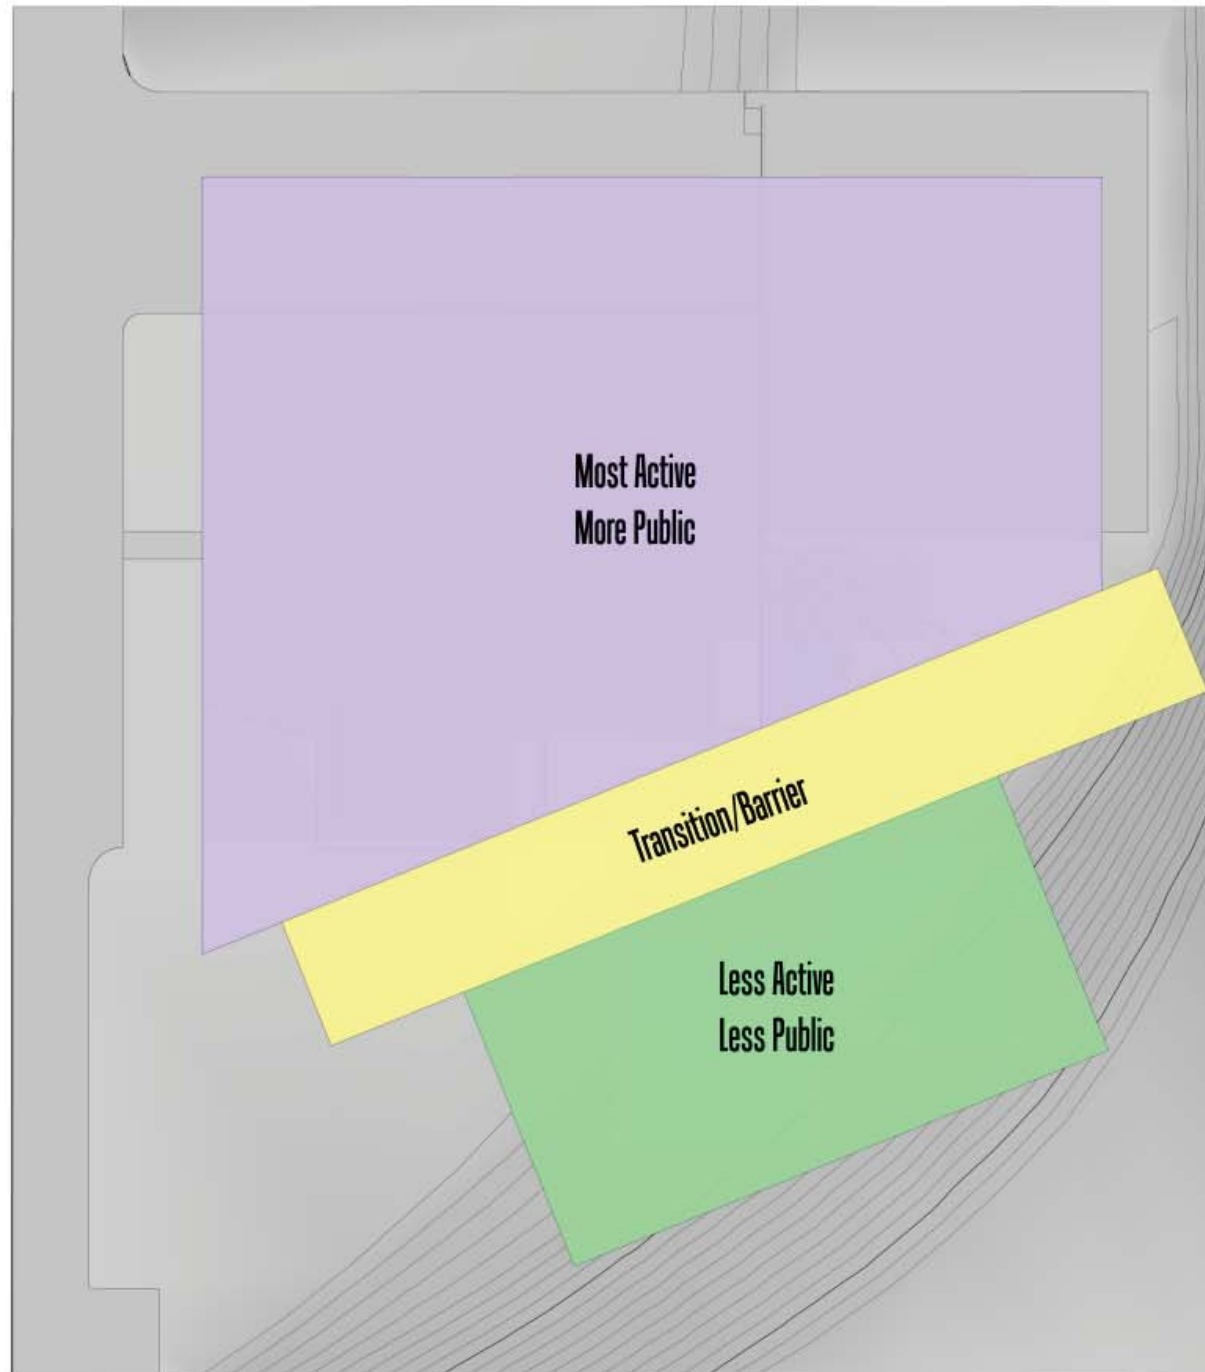

Growth – The facility is spatially divided so that many different activities can take place at the same time without interrupting each other

Progression – The dynamic form and order to the building creates a newer and nicely contrasted image for Kamiah

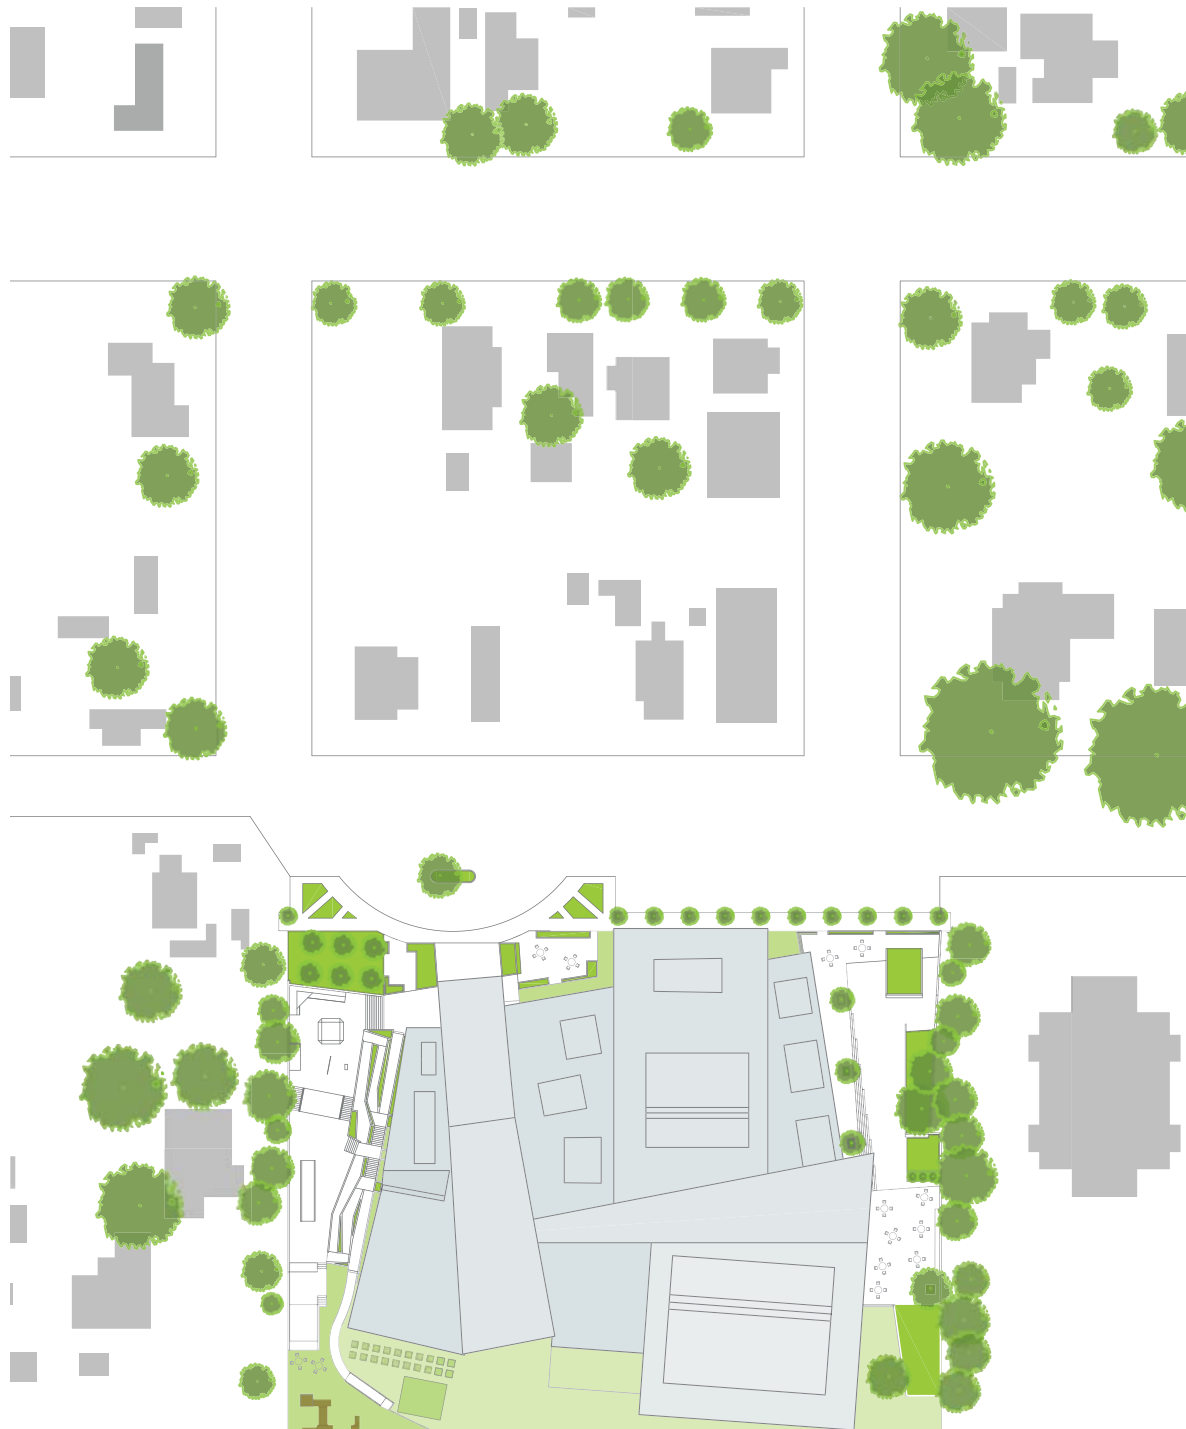

Controlled – The use of a lobby as a transition space allows for the visitor to directly access their intended destination without passing through multiple spaces

Protective – The use of transparency and spatial arrangement of offices within the building allows for successful supervision
